Guest: Dan Layzell, VP Finance & Planning: Vice President Layzell joined the staff at Illinois State University in September of 2009 and was invited to join this council meeting to address his goals for the Division of Finance & Planning/ISU. His main goals include

- To ensure ISU maintains a stable financial picture for both the short and long term
- To ensure the Division of Finance & Planning remains efficient & effective organization with a customer service focus
- To ensure the physical infrastructure of ISU remains a priority keeping ISU safe, secure and welcoming.

Council members also asked several questions, including:

- The recent restructuring of Administrative Technologies? VP Layzell cited the need for a more cohesive organization; moving off of a mainframe to an Enterprise Resource Planning (ERP) environment. Enterprise systems and business intelligence also need to be addressed as the campus mainframes are quickly reaching the end of their useful lives.
- The overall financial picture of ISU? Where VP Layzell said was good. The last 5-7 years have been very conservative budgeting, strategic planning and the ISU does not have a lot of long term debt. While the need is to focus on long term financial planning and making the best use of non-state generated funds, the next 5-7 years will be critical.
- What have been pleasant surprises since coming to ISU? where he mentioned the people who consider ISU a wonderful place to work, and that the ‘can-do’ attitude by all is refreshing
- What practices need to be kept toward moving ISU in the right direction? VP Layzell reiterated that ISU is student focused, which is truly and part of the culture on campus
- The Campus Master Plan, where he reviewed the format of the focus groups in public forums in November 2009, and referred to the comments on the website at http://www.masterplan.ilstu.edu/plan_update/public_forum_feedback.shtml. A main theme that ran through all comments was that people liked the Quad as the center of the academic campus.
• Have there been changes with the plan to hire a CIO? VP Layzell responded that the infrastructure needs to be in place first
• Income generation for ISU? VP Layzell responded that student fees are currently not slated to increase, and other than tuition, private giving through funds raised by University Advancement are critical
• Any interest in differential tuition? VP Layzell stated that the university would need to proceed cautiously in considering this as an option and be fully aware of the consequences first
• Possibility of expansion of academic offerings? He said in these financial times this would need to be explored very carefully as President Bowman is committed to keeping enrollment at the 20,000 level
